To whom it may concern,

Mr. Dennis Geier is currently a patient of mine and is dealing with a complex medical condition for which he recently had cardiac surgery and is dealing with complications of procedure. He is also raising his 5-year-old son and needs assistance with both childcare and medical care. It is my understanding that his wife is currently in China and working on getting a Visa to the United States. If this process can be expedited at all, it would be very beneficial to my patient and his medical care.

Sincerely,

Dr. Wojciech Mazur
